## PROFESSIONAL BOOK EDGE DIGITAL PRINTING CONTROL SYSTEM

### Self-development software

professional book edge digital printing control system.  
In accordance with the characteristics of the book edge printing.  
To achieve color what you see what you get.

### High-efficient and accurate typesetting

Built-in book edge printing professional typesetting module,  
to achieve fast and efficient typesetting.  
The book edge positioning wireframe technology is adopted  
to realize the accurate positioning of the book edge image.  
One-button batch import and self-adaptive cutting image  
function, greatly improve the typesetting efficiency.

### Excellent printing quality

With ICC color management technology, as well as guided  
color management method, it is easy to achieve excellent  
printing quality.  
Color adjustment adopts user-level and professional level ad-  
justment mode, that is, to ensure the stability of color man-  
agement and provide users with the ability to adjust quickly.  
The use of FM screening technology and the ICC standard  
source of book edge printing can enlarge the gamut space  
and improve the quality of color restoration.

EDGE DIGITAL PRINTING

# OPEN UP NEW OPPORTUNITIES, CREATE GREATER VALUE FOR YOU!

## **Extensive book applicability**

The Bookedge E6 printing format covers more than 98% of the book size on the market. The application of digital ink-jet technology can start printing in one book, perfectly matching the current personalized production needs; With industrial control system and special clamp, high-speed and high-quality batch production can be realized.

The vivid color performance and environmental protection of water-based ink green printing enable the Bookedge E6 to achieve highly expressive and stable color green printing on different paper cuts.

## **Time and labor saving and simple operation**

People oriented graphical control interface, smooth touch screen operation, multi angle rotation of the control screen make it easy to use.

The local storage of production operations can be called at any time to help customers manage production business better and expand new business.

## **Revolutionary mode of production**

Production speed: 1000 books/hour, meeting the demand of large-scale book edge printing production of printing factory. The patented vertical rotation four station design is adopted, which can realize the four processes of loading, cleaning, printing and downloading on a vertical elevation. Fully automatic circulation control of the four book clamps can achieve automatic continuous printing.

## **Powerful file processing process**

Intelligent printing and output capability, massive job processing, strong file compatibility, real-time typesetting preview output achieve what you see is what you get.

# SUCCESS

QUALITY CREATES  
THE FUTURE

## High-quality opens high-value-added business

The book edge with the beautiful patterns are in harmony with the book theme and text, become the finishing touch of our books. Bookedge E6 brings more creative space for the book's quality customization and individuation and give the book a high added value.

## Vivid and beautiful color details

Up to 720\*1200DPI printing precision, bringing production quality comparable to traditional printing. The system matches a variety of printing modes to meet different production needs, taking into account the production quality of traditional printing and the flexibility of digital printing. CMYK4 color printing, extremely lifelike color performance.

# BOOK EDGE E6

## Excellent book edge printing Solution

The traditional printing process is difficult to achieve the presentation of exquisite images and texts on the book edge medium. Bookedge E6 printing solution, deeply understand the current situation and needs of this printing process, and develop it based on the new inkjet printing technology.

With quality, speed, precision and application innovation, Bookedge E6 brings the bookcase printing to a new level. It has brought more creative space for the high-quality, customized and personalized printing, and has brought new sensory experience for the audience.

## ALL NEW PRODUCTION PROCESS

The powerful Bookedge E6 printing system is suitable for different paper cut materials. The excellent image quality and reliability bring new production processes and help you expand more wonderful printing services.

## EQUIPMENT SPECIFICATION

Maximum book format: 450\*450mm

Maximum book clamping thickness: 200mm

Capacity: 1000 books 3-sided printed per hour  
(in 185\*185\*10mm book size; Three-sided printing)

Printing resolution: 720\*1200DPI

Number of fixtures: 4 sets

Operation mode: 4 sets of vertical circulation clamps  
Rotatable touch screen operation

Ink: Cmyk four color water-based ink

Equipment size: 2.5\*1.85\*2.3m(L\*W\*H)

Standby power: 60W

Working power: 2500W

Working temperature: 17-35°C

Working humidity: Non condensing 20%-80%
