

YBERIA SERIE 9060 UVLED

INTUITIVE OPERATING SYSTEM

Yberia's UV 6090 features user-friendly software and an intuitive interface that simplifies the printing process, allowing users to adjust settings according to material specifications. With a robust design and versatile configuration, this printer adapts to high-demand projects without losing performance.

LARGE PRINTING AREA

This printer offers a 600 x 900 mm print area, ideal for small orders to large volumes without sacrificing quality. Designed to meet the demands of businesses looking for professional and versatile printing, the UV 6090 allows you to create customized products such as signs, displays, decorative items and more.

Yberia's 6090 UV printer offers total versatility when working on surfaces such as acrylic, metal, wood, leather and more. With a 600 x 900 mm print area, it guarantees high quality results in a wide range of applications. The UV 6090 is ideal for creating durable, high quality prints on a wide variety of materials. From wood to leather, glass and acrylic, this printer guarantees excellent ink adhesion, providing strong, vibrant prints that stand out on any project.

UV FOR INTENSE COLORS

Equipped with a UV inkjet system, the 6090 guarantees brilliant colors and exceptional durability in any application.
